EDUCATION

University of Maryland, College Park

College Park, MD

Bachelor of Science, Computer Science and Applied Mathematics

Expected May 2027

Coursework: Object Oriented Programming, Discrete Math, Advanced Data Structures, Advanced Algorithms, Linear Algebra, Probability Theory, Data Science, Artificial Intelligence, Computer Network Security, JavaScript Development

SKILLS

Languages: Java, Python, C++, Go, OCaml, TypeScript, JavaScript, HTML/CSS, SQL

Technologies: React, Node.js, Next.js, MongoDB, Tailwind, Firebase, Flask, Google Colab, AWS, JUnit, Docker, Git

EXPERIENCE

Software Engineer Intern

Dec 2025 - Present

Roblox Corporation

San Mateo, CA

- Incoming Software Engineer Intern @ Roblox

Security Software Engineer Intern

May 2025 – August 2025

Workday

McLean, VA

- Optimized Okta SSO on-boarding workflows, resulting in a 70% reduction and 6+ hours saved in manual workload
- Streamlined Internal Campaigns by deploying an AI Slack bot, automating support for 150+ requests per quarter
- Integrated Retrieval-Augmented Generation via AWS Bedrock and S3, enabling relevant responses to FAQs
- Accelerated support resolution by 30+ minutes through an AWS Lambda function returning agent output to Slack

Software Engineer

August 2024 – Present

Hack4Impact-UMD

College Park, MD

- Collaborated on teams of 10+ students building full-stack web applications for local non-profit organizations
- Built a customization icon feature with 40 accessible mappings for Rise DC during the Microsoft Global Hackathon
- Created application forms for H4I website utilizing Firebase and React used by over 300 students per semester
- Reduced FFA-DC on-boarding time by 30% via a customer profile system integrating Google Place Autocomplete

Java Team Leader

June 2021 – July 2023

Kids for Code

Remote

- Co-designed a robust Java curriculum focused on object-oriented programming and foundational data structures
- Lead a team of 17 instructors, engaging 40+ students per session from 13 countries via weekly online classes

PROJECTS

MLB Stats | *TypeScript, React, Next.js, Node.js, Python, Flask, Redis, Tailwind, Git*

- Engineered a full-stack web application displaying 30+ hitting metrics for each user-specified player
- Deployed a Flask REST API on Render enabling fetching of 800+ active MLB players career statistics
- Optimized API latency by implementing Redis caching, achieving sub 200 ms response times for recurring queries

Spotify Activity Tracker | *Java, Spring Boot, Kafka, MongoDB*

- Developed a Spring Boot microservice to aggregate and persist account listening events and playlist manipulation
- Built a reliable asynchronous pipeline using Apache Kafka to ingest events polled from the Spotify API
- Integrated MongoDB to store and serve real-time user analytics, including Top Genres and 12-hour activity reports

Auto Security Vulnerability Classifier | *Python, Scikit-learn, Pandas, Docker, Github API, Git*

- Engineered an automated security triage pipeline processing findings from multiple security scanners
- Implemented a multi-label Scikit-learn classifier trained on OWASP/CWE taxonomies, achieving a 92% F1 Score
- Developed a Dockerized service to automate ticket creation and assignment using the GitHub Issues API
